

EATA2015

16-17 June

Stockholm

www.eata2015.org

what?

The 6th Conference of the European Asphalt Technology Association will focus on modelling, characterization and field cases for asphalt pavements. The Conference will combine focussed workshops, presentations of ongoing research projects and expert panel discussions.

where & when?

Hosted by KTH Royal Institute of Technology, EATA2015 will be held in Stockholm from 15-17 June 2015. Built on 14 islands connected by 57 bridges, home of the Nobel prize and capital of Sweden, Stockholm is a beautiful and welcoming city that has attractions for all.

why?

In a changing world, where social, economic and environmental sustainability are prioritized into advanced engineering design, the international asphalt community is not falling behind. Come and join the top researchers in this field to share the latest advances and contribute to future directions.

wow?

Submit your full paper before 15 October 2014. From a peer review process, papers will be selected for presentation at the Conference and for publication in a Special Issue of the Journal of Road Materials and Pavement Design (T&F).
